About the Authorpage 67

Q: What do paper plates, plastic Easter eggs, lunch bags, and Popsicle sticks have in common?

A: They can all be used in your classroom tomorrow to create a little organized **CHAOS!** Learn how in this book of ideas from veteran teacher and consultant, Cary Nadzak.

Here's what they're saying...

"This book has been long awaited! Cary is so spirited and inspiring with a cracked safe full of awesome ideas to engage students to learn and motivate teachers to make learning fun. I've never taught the same after attending her seminars. No more theories, just straight forward ready to use, engaging ideas to teach ALL subjects. I've been begging her to create a book. This book is a must buy for all teachers, all subjects, all grade levels! It's time to think outside the box."

– M. Baros, Rockdale County High School

"I attended two of Cary's presentations at the *High Schools That Work* Summer Conference in Atlanta, GA. They were THE BEST presentations that I've ever attended in education."

– K. Young, Green Oaks Performing Arts Academy

"Believe me, she really does these things with her kids. I should know - I'm in the classroom next to her!"

– D. Pelkey, Fort Dorchester High School

"Cary presented at a school workshop I attended. I was impressed with her innovative classroom activities. I have implemented many of her strategies with great success. My students have started asking what we are doing next. Pass-the-Folder is a great activity. While the students spend most of their time reading a chapter, they do not realize they are learning! And who would have thought putting questions in Easter eggs would have motivated students to review geography? But it does!"

– G. Massey,
Florence High School
